

INTEROFFICE CORRESPONDENCE

DATE: March 15, 1995

TO: W. L. Hayes, Surface Water, Building T893A, X2181

FROM: G. D. Guinn, Environmental Policy & Regulatory Integration, Bldg. 080, X8661

SUBJECT: SURFACE WATER AND STORM WATER ISSUES ASSOCIATED WITH BUILDING 889 - GDG-006-95

DOE Order: 4700.1

Action: Water issues evaluation for Building 889.

As per our discussions, Building 889 is scheduled for Decontamination and Decommissioning (D²). Deactivation of that facility is on-going at this time. As part of the Remediation and Environment Action Documentation (READ) process, Building 889 must be evaluated for water issues prior to commencement of facility work. Your group's assistance in this effort would be greatly appreciated. The evaluation should identify any water issues or concerns associated with the D² activities of Building 889. In addition, it should provide the project manager with the correct information (as appropriate regarding surface water issues) to be included in the Health and Safety Plan, Sampling and Analysis Plan and the Action Plan.

Building 889 is a pilot project for the future efforts of Deactivation, Decontamination, and Decommissioning (D³) at the Rocky Flats site. The information you provide will become part of the administrative record for this project and will be addressed in future plans for D³ of other facilities.

Building 889 is being managed by John Raffaldi, extension 8567, and Michael Klein, extension 3703, is the project manager. If I can provide any assistance, please do not hesitate to contact me on extension 8661. Activity charge number is 989646.09. Thank you again for your assistance.
